Description				
<p>The owners of this 25-year-old vacation home wanted to renovate the first floor master suite and laundry room to better meet their needs for a permanent move to the home.</p> <p>Limitations and Problems:</p> <ul style="list-style-type: none"> • The bathroom had dated fixtures and awkward angles. • The bathtub was too small and not being used. • The shower stall was small and in a dark corner of the room. • Because of the balanced exterior pattern of the windows and the fact that the house is located in a historic district, the homeowners did not want to move any windows. • The 122" ceilings in the bathroom felt too high, and included many floating soffits. • The shared master bedroom closet space was limited and had a vanity that was visible from the bedroom. • The laundry closet inside the powder room didn't provide enough space to work in, and the room was seldom used as a bathroom since there was another powder room nearby. • A cherry inlaid floor in the hallway was not to be disturbed therefore limiting the movement of doors and walls in that area. <p>Solutions:</p> <ul style="list-style-type: none"> • Enlarged the master bathroom by expanding into the rarely used powder room, and updated the master bathroom with a "spa" feeling. • Installed a larger whirlpool tub and larger shower with multiple fixtures and bench. • Removed the vanity in the closet area to provide a separate closet area for him, therefore freeing up more space in the main closet for her. • Using Wellborn Premiere cabinetry, we provided more cabinet storage and included two vanities in the master bathroom space. We used the Seville Square door style in maple painted Divinity. • A wall void behind the toilet allowed us to install another recessed cabinet for additional storage. • The dated cultured marble countertops were replaced with Costa Rosa granite, which was also 				

carried into the shower and tub deck.

- Custom tile work was done throughout including a heated floor and large custom shower.
- Lowered the ceilings to 9 feet and added crown molding to make the bathroom cozier, and removed the floating soffits.
- Provided a separate laundry room with more storage and work space.
